Scott,

Thank you for the information. At this time we would like to have Fastclick ads removed from the Aurora application. Internal testing shows Aurora to be popping far too frequently. If you have any questions please contact me.

Matt, I was asked to respond to your questions.

First, Fastclick ads are being served on Aurora. Second, we generally distribute our software through bundle deals -- packaging our ad software with P2P programs, screensavers, games, etc. So if you downloaded a free, popular internet application, this is the likely

source of you having received our ad software.

Does this help?

Regards,
Scott

Sandy,

Thank you for the links.

Do you have any information on the following,

<<http://www.netrn.net/spywareblog/>> <http://www.netrn.net/spywareblog/>

I'm still puzzled myself as to how I started receiving pops on my own computer.

Hi Matt,

Josh just had to leave the office unexpectedly so let me give you a couple of links that might be useful.

As I mentioned, Aurora is our ad client, part of the ABI network. Please take a look at the following:

<http://biz.yahoo.com/prnews/050425/nym211.html?v=4>

<http://www.direct-revenue.com/consumers.php>

Please let me know if this doesn't answer your questions.

Thanks, Sandy

Sandy,

Are any Fastclick ads running on the Aurora program? Please advise as soon as possible. I have personally been hit w/ the program on my home PC and it was extremely difficult to remove.
