**Subject:** Re: Daily Footprint Summary 2005/05/01

we need to stop all unbranded installs as of TODAY - RIGHT NOW. This is really critical. Please turn them off ASAP and then make whatever changes are necessary to make the recovery installs go to ceres or aurora (I thought we already had that covered?) Check Limelight. They seem to have some of our old thinstallles on there. you may want to delete them from there as well
