

# **EXHIBIT 2**

**Answer to Questions of December 1, 2005**

- 1. Identify the number of times the target software (whether proprietary or third party) has been downloaded to consumers by or on behalf of DirectRevenue, including, initial installs, updates and recovery installs. Please provide this information broken by distributor or for initial installs from DirectRevenue's own websites and Active X advertisements, by website or advertised program.**

Attached as Schedule 1 is a spreadsheet indicating the number of daily check-ins to DirectRevenue's servers by the target software, the daily number of new installations of the target software, and daily the number of recovery installations of the target software. This data is broken down by computers with US ip addresses versus computers with ip addresses from the rest of the world. A recovery installation can be a result of the target software's poller functionality replacing missing files, adding missing distributor information or any other technical abnormality in the ad client. Additionally, in about November 2005 a technical error resulted in the replacement of distributor identification numbers in regards to many ad clients, so that many of the target software appear to be "recovery installations", but are not. A user would not have noticed this technical error.

With regard to the number of new installations, DirectRevenue believes these numbers are not completely accurate, and in fact, are higher than the actual number of the new installations. The over-counting of new installations is the result of a number of technical issues, including, multiple users on a single machine damaging the registry key entry that has the installation id number, lack of a persistent installation id in 2003 and 2004, multiple installation attempts by certain distributors and other technical issues. DirectRevenue generally pays its distributors on a per installation basis and this counting methodology would otherwise cause overpayments to distributors. Because of the technical realities that make over-counting inevitable and virtually impossible to avoid, DirectRevenue takes this over-counting factor into account when negotiating a cost per download with its distributors.

In Schedule 2, the number of new installations of target software is presented broken down by distributor. Those distributor names that are noted with an asterisk or "SDI" are vendors from whom DirectRevenue merely purchased media by which DirectRevenue marketed software.

Schedule 3 lists the upgrades to the target software distributed.

Schedule 4 sets forth for various distribution channels the type of distribution to the extent known. "Bundle" refers to the fact that the target software was bundled with other software by the distributor. "Active X" modal box means that Active X technology was used to distribute the software, usually in connection with media purchased on third party web sites. "Banner" indicates that banner ads were purchased on third party web sites, through which consumers could reach landing pages where the target software was made available. "Onclick" means a consumer had to click on a banner or web page to initiate a download process. "Wise installer" is a technology by which software is downloaded onto consumers' computers and is the successor technology to the Active X technology due to the changes made by Microsoft to its Windows operating system.

Schedule 5 presents the number of installations of target software based on the consumer application (e.g., various screensavers, emoticons, VOIP software, and the like). These numbers, like the new installation numbers referenced above, are over-stated.

Schedule 6 presents the number of installations of the third party software from Walnut Ventures and Top Moxie distributed by DirectRevenue. Since TopMoxie is not paid on a per installation basis, their counting methodology has not been verified, but it is not believed to be accurate. These numbers have been reviewed, but are believed to be an approximation only.

**2. Identify the amount of revenue generated by DirectRevenue from the distribution of the target software (whether proprietary or third party) since the foundation of DirectRevenue. Please provide this information in aggregate and, to the extent possible, broken down by distributor.**

The table 2A below sets forth the revenue attributable to any Direct Revenue target software (i.e., through the sale of advertisements placed through Direct Revenue target software), and revenue that is not attributable to a Direct Revenue Program (mainly for the resale of third party advertising inventory, but software development work is also included). Generally,

**Confidential**

DirectRevenue does not track revenue on a per distributor basis. In that small number of cases where DirectRevenue pays distributors on a percentage of revenue generated basis, revenue is estimated for that distributor on an individualized basis. For these distributors, the amount of revenue generated is a manual calculation that DirectRevenue performs and is believed to be an approximation, but not an exact measure of revenue. These estimates are set forth in Chart 2b below.

**Chart 2A**

	<b>2003</b>	<b>2004</b>	<b>2005 (thru Octob)</b>
Revenue Attributable to a Direct Revenue Program	\$6,134,875	\$27,994,341	\$24,272,155
Revenue from other sources	\$ 848,440	\$ 11,337,620	\$9,214,365
Gross Revenue	\$6,983,315	\$39,331,961	\$33,486,520

**Chart 2B**

<b>Distributor/Application</b>	<b>2004 Revenue</b>	<b>2005 Revenue (thru Oct)</b>
New Media Now		\$38,000
Coulomb		\$22,000
TeleSolutions		\$224,000
iDownload.com		\$490,000
ICMD	\$200,000	\$140
WSW Surf assistant		\$1,020,000
imGiant		\$55,000
West Frontier Holding SA	\$356,000	\$1,640,000
Global IP	\$272,000	\$10,000
Sharman Networks		\$108,000

**3. All financial statements for DirectRevenue since the company's founding, including, without limitation any financial statements communicated to DirectRevenue's owners or investors.**

See the Schedule 7 financial statements from 2003 through October 2005, including audited results for 2003 and 2004. Due to a request from Insight Venture Partners, Inc., a venture capital firm that invested in DirectRevenue, the 2003 financial statements include financial information

for entities not owned or controlled by DirectRevenue, but in which the members of the limited liability company also had ownership interests.

**4. Documents sufficient to identify all payments made by DirectRevenue, whether directly or indirectly, to Joshua Abram, Alan Murray, Daniel Kaufman and Rodney Hook, including wages, stock grants option grants, other equity grants, cash disbursements, loans or any other valuable payment or consideration.**

The following Chart 4 sets forth cash payments from DirectRevenue to the four named individuals, who are all members of DirectRevenue Holdings LLC. Originally, the four individuals were the sole owners/members of DirectRevenue. Then, in 2004 Insight Venture Partners, Inc. purchased approximately 25% of DirectRevenue from the four individuals. This purchase resulted in a change in DirectRevenue's capital structure and the specific ownership interests of the individuals. The payment attributable to the acquisition of this equity was about twelve million dollars, which money flowed through DirectRevenue as a "Distribution" to the partners. Thus, the majority of the payments made to the individuals in 2004 were "Distributions" that reflected this sale price. In 2004, DirectRevenue also borrowed approximately fifteen million dollars and six point seven million dollars from Insight Venture Partners and Technology Investment Capital Corp (TICC), respectively.

None of the individuals has received any stock option grants or loans from the DirectRevenue.

With regard to the terms in Chart 4, for 2003, "Payments" include expense reimbursements, payments in lieu of salaries and partner distributions. For 2003, approximately 40% of the payments to the four individuals collectively were payments to the individuals in lieu of salary.

In Chart 4 for 2004 and 2005 there are four kinds of payments - Guaranteed Payments, Tax Distributions, Expense Reimbursements and Distributions. "Guaranteed Payments" are payments made to the individuals in lieu of salaries since the individuals are all members of DirectRevenue Holdings LLC. "Tax Distributions" are those payments that have been made to members of DirectRevenue Holdings LLC to cover the taxes on the income imputed from the LLC to its members (i.e., the members each receive Schedule K-1's at the end of the year).

"Expense Payments" are expenses incurred by the individuals made on behalf of DirectRevenue, including, travel and entertainment expenses, media purchases, equipment purchases and the like. "Distributions" are distributions made to the members of the LLC.

**Chart 4**

	<b>Alan Murray</b>	<b>Daniel Kaufman</b>	<b>Joshua Abram</b>	<b>Rodney Hook</b>
<b>2003</b>				
Payments	171,319	119,016	412,967	81,275
<b>2004</b>				
Distributions	5,781,797	6,746,584	7,760,577	1,013,993
Tax Distributions	463,552	515,872	184,541	81,262
Guaranteed Payments	165,000	228,000	180,000	180,000
Expense Reimbursements	25,734	48,907	8,048	-
<b>Total 2004</b>	<b>6,436,083</b>	<b>7,539,364</b>	<b>8,133,166</b>	<b>1,275,255</b>
<b>2005 (through Dec 1)</b>				
Tax Distributions	840,198	972,085	1,529,165	153,722
Guaranteed Payments	165,000	165,000	165,000	170,000
Expense Reimbursements	13,836	5,016	4,154	-
<b>Total 2005</b>	<b>1,019,034</b>	<b>1,142,101</b>	<b>1,698,319</b>	<b>323,722</b>

**5. Describe all steps from conception to creative to actual delivery of an ad, that lead to the delivery of pop-up advertisements to consumers through DirectRevenue's target software. This description should include an explanation of whose servers or computer networks deliver the advertisements or content to consumers, whether third-party ad servers or tracking technology is used, and the relationships among, and the respective duties performed by Soho Digital, Direct Revenue, any third party ad server, the tracking technology and the advertiser. If the manner in which such ads have been served has changed, please provide a detailed description, and the specific duration, of each manner. If there are multiple manners for the delivery of pop-up ads, please describe each manner. For DirectRevenue advertisers Match.net, Monster, AT&T, Cingular and Priceline, please describe the means and method of delivery of ads, including, without limitation whose servers are engaged, how delivery occurs, and who supervises the process of ad delivery.**

DirectRevenue either obtains ads from its advertising clients, from their advertising agencies, or very occasionally it creates them for its advertisers. DirectRevenue also may obtain ads to serve from affiliate marketing networks, e.g., Linkshare, where advertisers make their offers available for distribution on the Internet. In many cases, the ad is merely a landing page provided by the advertiser, e.g., an advertiser's home page provided in an advertising window. Most sales of

advertising inventory are conducted by Soho Digital, Inc. or Soho Digital (Israel) Ltd. as sales agents of or third party resellers for DirectRevenue.

An ad may be hosted on the servers of the advertiser, a third party ad server, or DirectRevenue itself. Generally, it is the advertiser's decision on whose ad server the ad is hosted. If the ad is hosted other than on DirectRevenue's servers, DirectRevenue would have no control or knowledge of changes to the advertising content. The ad will be given a trafficking tag by the hosting party (i.e., a URL to be called by a browser or other software to obtain the ad). The trafficking tag for the ad is input into DirectRevenue's ad serving system, as well as targeting instructions for the ad (e.g., dates for the ad to be run and that it is to be served when a user is at a dating web site).

When a user with the target software is online, the software occasionally provides information to DirectRevenue's servers regarding the web site to which the user has gone, as well as information stored in the DirectRevenue cookie on a user's desktop, such as historical ad viewing and the type of sites visited. Based on this information, DirectRevenue's server-side ad serving software determines whether an ad should be served and in particular what ad should be presented to a user. For example, if a user has seen less than the maximum number of ads per day and is on a dating web site, the user might be presented a dating ad. DirectRevenue's software calls the tag that was input into its ad serving system. This tag may call DirectRevenue's own server, a client's server, or a third party ad server to actually deliver the ad to the user. If the ad is hosted on other than DirectRevenue's servers, it is the advertiser's responsibility to make sure the ad is actually served. An advertiser may provide multiple ads for a campaign and DirectRevenue will rotate among such ads to be presented based on the advertiser's criteria.

DirectRevenue uses its own cookie based tracking technology, which technology collects certain non-personally identifiable information so as to better target advertising to the user (e.g., the URL or keyword of the web page being viewed). Advertisers may have their own tracking technology or license it from their party vendors. Additionally, an advertiser may include

tracking pixels in the ad itself, separate and apart from the ad serving technology. In such a case, DirectRevenue likely would have no knowledge as to the presence of such technology. If DirectRevenue obtained the ad from an affiliate marketing network (e.g., Linkshare), it is likely that the affiliate marketing network would have applied some type of tracking technology to the ad or trafficking tag.

Additionally, DirectRevenue provides to users dynamic advertising feeds, e.g., search results with paid search inclusions and comparative shopping offers, in response to certain user activity, e.g., mistyping a URL or going to an e-commerce website. In the case of these feeds, it is the responsibility of DirectRevenue's vendors to obtain the advertisers (i.e., the paid search inclusions or the actual comparative offers). They may do this sourcing through third parties (e.g., shopping.com as a source of comparative shopping offers).

In the process of DirectRevenue's providing these feeds to users, a third party vendor of DirectRevenue may drop cookies on a user's desktop to enable the feed. For example, if a user is provided an ad based on the activshopper comparison shopping tool licensed by DirectRevenue, the activshopper software drops a cookie on the user's desktop to allocate the source of the sales if that user selects a comparative shopping offer within the ad. DirectRevenue's agreements with these third party vendors requires that these vendors use this data only for the purposes of fulfilling their services for DirectRevenue or otherwise on an aggregated, non-identifiable on a computer-level basis.

DirectRevenue believes match.net and Monster use Atlas (a subsidiary of Acquantive) as a third party ad server to serve ads. DirectRevenue believes Cingular uses DoubleClick as a third party ad server to serve ads. DirectRevenue believes Priceline hosts its own ads. DirectRevenue may host AT&T's ads and some of Monster's and Priceline's ads.

**6. Describe what uninstall procedures were available to consumers prior to the creation of the MyPCTuneUp website.**

Prior to the creation of the MyPCTuneUp website (about February 2004), based on the rate at which the target software checks in to DirectRevenue's servers, approximately 50% of users removed the target software from their computer within a thirty day period. Thus, users have been and continue to be able to uninstall the target software even prior to the introduction the MyPCTuneUp website. Various methods are (and were) available to users to uninstall the software, but DirectRevenue is not able to track the instances in which one method is used versus another.

Prior to the creation of the MyPCTuneUp website, some versions of the target software contained an integrated uninstall functionality that consumers could access via the Microsoft Windows Add/Remove functionality (e.g., all Ceres and Solid Peer versions of the target software included a functionality). Additionally, manual uninstall instructions were posted on the Internet for various early versions of the target software, e.g., at [www.vx2.cc](http://www.vx2.cc) and [www.tps108.org](http://www.tps108.org). Examples of such instructions are set forth in Schedule 8 to this letter.

Users would be aware of the web addresses (URL) to look for this uninstall and support information because the ads were provided to users in an Internet Explorer window that provided that information. For example, if a user looked at the page properties, file source or page history of the Internet Explorer window, the user could determine the URL source of the ad. Also, in many of these windows the URL would appear in the title bar.

Prior to about December 2004, many anti-virus software programs would remove the target software programs. Indeed, in notices posted on the aforementioned website of VX2, users who did not wish to use the posted uninstall instructions were directed to a free, third party program, Ad-aware, available at download.com that would remove the target software programs.

Moreover, in 2003, DirectRevenue, lacking its own sales force at the time, sold a large of majority of its advertising through Traffic Marketplace (TMP) and ValueClick ad networks.

These ad networks branded the advertising they provided through the target software. If a user contacted either TMP or ValueClick and wished to uninstall the target software, TMP and ValueClick had DirectRevenue's uninstallation instructions that they could and would provide to the user. ValueClick and TMP would provide feedback to DirectRevenue regarding any user issues. Because Direct Revenue at the time lacked it's own ad sales force and was completely dependent on the goodwill of the above listed companies to place ads on the DirectRevenue network, DirectRevenue often asked these vendors about the level of consumer complaints that they were receiving. These vendors consistently praised DirectRevenue as having a particularly low complaint rate when measured against their experience with other adware companies.

More recently, all versions of DirectRevenue's target software being distributed including their own uninstall functionality and entry in the MS Windows Add/Remove functionality. The MyPCTuneUp functionality will only be required for historical target software, as well as a back-up uninstall mechanism.

Highlighting the technical difficulty of tracking uninstalls, it is worth noting that, even during the period that the MyPCTuneUp site was the main method that DirectRevenue intended for consumers to uninstall the target software, DirectRevenue believes it records only about one third of the uninstalls performed through that website.

**7. Identify and describe any target software programs distributed by DirectRevenue not previously identified in the Affidavit of Alan Murray, including any toolbar or "Microbuddy" applications. Please also provide a clearer, color reproduction of the e-mail Bates-stamped DR031535 portraying the Microbuddy and Toolbar applications.**

Microbuddy was a browser help object (BHO) developed by DirectRevenue and distributed on a test basis only for two months in 2004. The BHO displays contextual advertiser text links within the end user's browser. As a test in March and April of 2004, DirectRevenue distributed the Microbuddy BHO to a small portion of its Canadian user base, i.e., less than fifty thousand desktops. Thus, from DirectRevenue's perspective, this toolbar was never distributed on a commercial scale. That being said, DirectRevenue's failure to include this toolbar in the previous submissions was an oversight.

Upon reviewing the results of this test, DirectRevenue decided to not to distribute the product commercially due to poor revenue performance during the test.

A clearer copy of the e-mail (Document bates No DR349497) showing this toolbar is attached.

DirectRevenue is unaware of any other target software programs distributed by DirectRevenue not previously identified in the Affidavit of Alan Murray.

**8. Identify all third-party distributors of the target software that DirectRevenue has suspended due to the manner used by the third parties to distribute DirectRevenue's programs, including potentially or alleged deceptive or otherwise illegal installation tactics. Identify which of these distributors were subsequently used by DirectRevenue to distribute the target software.**

DirectRevenue has responded to multiple instances where it has believed that its third-party distributors have not complied with the terms of their distribution agreements that require providing notice to consumers and obtaining their consent before downloading the software. On at least a dozen occasions, DirectRevenue has terminated a distributor due to concerns about the distributor's disclosure and consent practices. DirectRevenue's general response to a concern regarding sufficiency of notice and consent has been to suspend a distribution channel and investigate the source of the concern. Based on the investigation, DirectRevenue determines whether the concern has been resolved and the distribution can continue, or whether the distribution channel should be permanently terminated.

Prior to September 2005, many of DirectRevenue's distributors would distribute the target software through subdistribution channels. Pursuant to contracts between DirectRevenue and the distributors, such subdistribution agreements still required that the ultimate user be provided with clear notice and be required to manifest their consent before installing the target software. The subdistribution channels were either affiliate-based or direct. Affiliate-based subdistribution allowed third parties to sign up with the distributor to distribute the target software with their own consumer application. Generally, there would be thousands of individuals in such affiliate-based networks. Direct subdistribution were instances where the distributors would engage third

parties to distribute the target software on its behalf, e.g., to create a bundle with other software and/or purchase the media to drive distribution.

For competitive reasons, DirectRevenue's distributors routinely and regularly refused to inform DirectRevenue of the identities of direct subdistributors. For affiliate-based distribution, there was no practical way for DirectRevenue to know the identities of each subdistributor. Given this lack of knowledge, it was difficult for DirectRevenue to conduct direct policing of the subdistribution of its target software. In response to this problem, DirectRevenue developed software to monitor the URL sources of the distribution of its software (i.e., the Canary product), but this technology had limited utility where someone was intentionally trying to avoid being detected in their committing actions in violation of the distribution agreement.

Based largely upon the inherent difficulty in policing the behavior of these subdistributors and the occurrences of specific instances where downloads may have been occurring without appropriate notice and consent, in September 2005, DirectRevenue ended all of its relationships with third party distributors who used affiliate networks or who would not disclose their direct subdistribution channels. DirectRevenue currently distributes its software only through its websites and landing pages and through distributors who directly distribute the target software and who do not use subdistribution.

The following are specific examples of distributors being suspended or terminated by DirectRevenue.

In 2004, DirectRevenue engaged a Canadian entity called IST to distribute its target software. DirectRevenue came to believe that IST was installing and uninstalling the target software in order to increase the number of installations seen by DirectRevenue. While DirectRevenue was investigating this issue, DirectRevenue heard from other sources that IST was charged with homepage hi-jacking. Based on this accusation and DirectRevenue's belief, DirectRevenue terminated its relationship with IST in October 2004.

In October 2004, DirectRevenue determined that CDT was distributing the target software, then removing and then reinstalling it in order for CDT to be credited with additional installations of the software. Additionally, DirectRevenue had concerns as to the sufficiency of the notice and consent obtained by CDT. DirectRevenue therefore terminated them as a distributor.

In 2004, DirectRevenue engaged Standard Internet as a distributor for its target software. In the fall of 2004, Standard Internet was found to be using a file name that was confused with the name of an executable file of the windows media player, which file may have been called in lieu of a user's calling for the windows media player. Standard Internet claimed that a third party conducted this activity. DirectRevenue suspended distribution through this channel immediately and required that such methods be stopped. Several months later, still concerned about Standard Internet's practices, including their consumer disclosure, DirectRevenue terminated its relationship with the company.

DirectRevenue terminated its relationship with Mindset on April 29, 2005 because they were distributing software for Intermix and Intermix had come under scrutiny for its distribution practices.

On April 29, 2005, DirectRevenue discovered downloads of the target software without notice and consent where the target software was traced back to DirectRevenue's third party distributor Seedcorn. Threatened with immediate suspension by DirectRevenue, Seedcorn turned off the subdistribution channel involved in this activity and Seedcorn was allowed to keep distributing the target software so long as it did not use the offending subdistributor. Seedcorn was terminated as a distributor in September 2005, as part of DirectRevenue's decision to cease all distribution through distributors who used affiliate networks.

DirectRevenue suspended WestFrontier as a distributor in April 2005 due to DirectRevenue's target software being included in a bundle of software that was being downloaded without appropriate notice and consent. West Frontier notified DirectRevenue that the specific subdistribution channel (i.e., the one affiliate among thousands) was turned off. Based on the

belief that this was one small subdistribution amongst the much larger pool of affiliate distribution conducted by WestFrontier, DirectRevenue allowed WestFrontier to continue its distribution of the target software.

On June 13, 2005 DirectRevenue determined that another bundle sourced from West Frontier containing the target software was being distributed without notice and consent. West Frontier informed DirectRevenue that the specific subdistribution channel was turned off. Again, based on the belief that this was one small subdistribution amongst the much larger pool of affiliate distribution conducted by WestFrontier, DirectRevenue allowed WestFrontier to continue its distribution of the target software. On June 29, 2005, DirectRevenue determined that another bundle containing the target software being distributed by West Frontier was being distributed without notice and consent. West Frontier assured DirectRevenue that the specific subdistribution channel was turned off. In September in conjunction with terminating all distribution through third party affiliate networks, DirectRevenue terminated distribution by West Frontier.

In May 2005 DirectRevenue determined that iDownload had subdistribution channels that were distributing the target software without notice and consent. These subdistribution channels were turned off. On June 16, 2005 DirectRevenue determined that the target software was being distributed by iDownload in connection with Crazy Toolbar, software that was known to be downloaded without user notice and consent. As a result, DirectRevenue's relationship with iDownload was terminated at that time.

On June 16, 2005, DirectRevenue discovered Epi Center Networks potentially was distributing the target software without appropriate notice and consent. Therefore, DirectRevenue terminated their distribution of target software.

On June 16, 2005 distribution through Simpel/Topconverting was turned off after DirectRevenue discovered that distribution of the target software was being downloaded without appropriate notice and consent. DirectRevenue investigated the matter and discovered the source of exploit

was through a subdistribution channel, which Simpel promptly terminated. DirectRevenue allowed Simpel to continue distributing the target software in July 2005. DirectRevenue worked with Simpel in early August to improve the level of its disclosure to users, but terminated Simpel as a distributor as of August 30 after another distribution without appropriate notice and consent was discovered.

In June 2005, Marketing Metrix Group discovered a subdistributor had appended an executable file to the software bundle they distributed in conjunction with DirectRevenue's target software. Based on this discovery, Marketing Metrix notified DirectRevenue that it had stopped distributing DirectRevenue's target software.

In July 2005, DirectRevenue asked Creatrix to improve its disclosure practices and provide additional information to users regarding the target software. Creatrix declined to do so. Therefore, DirectRevenue terminated Creatrix as a distributor.

DirectRevenue terminated distribution at the end of August 2005 through Motor Media Group due to the fact they were distributing DirectRevenue's target software in conjunction with dyfuca.internetoptimizer, Avenue Media's software, and DirectRevenue did not want to be associated with Avenue Media.

DirectRevenue terminated EU Software as a Distributor as of August 16, 2005 due to the discovery of a lack of a notice and consent being presented through a subdistribution channel of EU Software.

On September 27, 2005, DirectRevenue terminated all distribution through distributors that use affiliate-based networks to distribute the target software. Thus, DirectRevenue terminated all distribution through Verticlick, Elitemedia group, Briony, IEPlugin, adsperform, Seedcorn, online traffic broker, Coulomb/globalcharge, West Frontier, Oli Letay as of September 27, 2005. Additionally, for all distributors using direct subdistribution, DirectRevenue began requiring that it be made aware of and approve all URLs where the target software would be available.

DirectRevenue stopped distribution of the target software by IMGiant on November 21, 2005 after DirectRevenue determined that they were distributing software from a URL other than the URL approved for the distribution of the target software. Such offsite distribution may have been without appropriate notice and consent to users.

**9. Identify all (if any) categories of target software programs that DirectRevenue has remotely removed or uninstalled from consumers' computers due [to] the manner used to distribute the programs, including potentially or allegedly deceptive or otherwise illegal distribution tactics. Identify all (if any) categories of target software programs that DirectRevenue has remotely removed or uninstalled for any reason. Identify all (if any) categories of target software programs for which DirectRevenue has required users "re-optin" in order to continue to use the software.**

DirectRevenue has removed known viruses, its own software, software it has licensed from third party, and third parties' software in response to their attempts to remove DirectRevenue's software from users machines. DirectRevenue has never removed any security software, anti-virus software, consumer applications or any similar software. The removals were in accordance with Section 5 of DirectRevenue's end user license agreement (see e.g., Bates Nos. DR174641-DR174648) as set forth below:

Some of these third parties may attempt to install a virus, worm, trojan horse and/or other malicious and unwanted agent onto your computer. In order to ensure the safety of your computer, ABI may remove the virus, worm or trojan horse from your computer.

You understand and agree, by installing the Software that ABI and/or the Software may, without any additional notice to you, remove, disable or render inoperative other adware programs resident on your computer. This in turn, may disable or render inoperative other software resident on your computer, including software bundled with such adware. This may also have other adverse impacts on your computer.

DirectRevenue has removed old version of its own target software, certain versions of the target software that it had licensed from VX2, TrueData and tps 108, as well as Lycos' version of a target software for the userbase of such software that DirectRevenue acquired from Lycos in December 2004. DirectRevenue believed such an upgrade was within the term of Lycos' end user license agreement.

DirectRevenue removed the Sasser virus on users' computers when DirectRevenue determined that there were such viruses on users' machines.

DirectRevenue removed TSCash, CoolWebSearch and Elitebar functionalities, all of which deleted users' browser help objects (including the target software and other functionalities such as the Adobe Acrobat reader), after these functionalities attempted to remove the target software from users' computers.

DirectRevenue removed the following functionalities in response to their attempts to remove DirectRevenue's target software from users' computers: IBIS Toolbar, HuntBar, Search Enhancement Bar, SeekSeek, Key Host, IST functionalities, CDT's software, and Create a Monster. These functionalities include search highjackers, browser highjackers, home page redirects, 404 redirect functionalities, competitors' adware, and search bars.

In response to Avenue Media's removals of DirectRevenue's target software from users' computers, DirectRevenue removed Avenue Media's dyfucha and internet optimizer software. Of note, Avenue Media's end user license agreement allowed for Avenue Media to read individuals' MS Outlook address books and send adult content e-mails in the user's name to all listed e-mail addresses.

In about February 2005, DirectRevenue accidentally removed iDownload's 404 handler, but stopped after becoming aware of the issue.

DirectRevenue removed some Bulleseye Network software of Exact Advertising believing that Exact had been removing DirectRevenue's target software from users' machines. DirectRevenue ceased removing the software after a discussion with Exact.

DirectRevenue has not required users to "re-optin" in order to continue to use any software; however, no user has ever contacted DirectRevenue to complain about the removal of any of the above-mentioned software or asking that the removed software be reinstalled on their computer.

**10. Identify all instances where DirectRevenue distributed its target software programs through an update to the existing base (or a segment of an existing base) of a third party distribution partner. Identify all instances where DirectRevenue engaged in a "base swap" with a third-party distribution partner, i.e., where Direct Revenue installed a third-party software program onto its installed base (or a segment of its installed based) in whole or partial exchange for the third party installing DirectRevenue software onto its installed base (or a segment of its installed base).**

In November 2002, DirectRevenue licensed target software programs previously distributed by VX2 Corp, tps 108 inc and True Data. In December 2003, to the extent that any of such ad clients were still extant after users' uninstalls of the target software and normal churn, DirectRevenue replaced the few remaining versions of such target software programs with its own target software program.

In December 2004, DirectRevenue acquired from Lycos, Inc. the userbase of the Sideseach toolbar, which had been downloaded by approximately 750,000 users. DirectRevenue upgraded this software with DirectRevenue's own target software, installing on approximately one-third of the original Lycos base. DirectRevenue believed this action was allowed under the terms of Lycos' end user license agreement. The contract with Lycos has been produced under Bates Nos. DR 10223 through 10240. This was the last upgrade to a base undertaken by DirectRevenue. There were no such upgrades in 2005.

**11. Please Identify any affiliate, parent, subsidiary, predecessor or successor entities of DirectRevenue not identified on the previously produced document Bates-stamped DR005519, including past entities.**

The following Table 11a lists affiliate, parent, subsidiary, predecessor or successor entities of DirectRevenue. The following table does not include third party past entities that were under common ownership with DirectRevenue.

**Table 11a**

Entity Name	Juris of Incorp	Owner	Status
AmazingMerchants LP	DE	GrandStreet Media Buying LLC	Canceled 3/18/04
Bestdeals TV LP	DE	GrandStreet Media Buying LLC	Canceled 3/18/04
BestOffers LLC	DE	DirectRevenue LLC	Alive
BetterInternet LLC	DE	DirectRevenue LLC	Name changed to The Best Offers Network LLC
Coolshopping Links LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
DirectRevenue LLC	DE	DirectRevenue Holdings LLC	Formed Nov 2004, d/b/a in NY filed for Behavior Market Place
DirectRevenue Cayman Islands Ltd	Cayman Islands	DirectRevenue LLC	Formed Sept 2005
DirectRevenue Holdings LLC	DE	See cap table previously produced	Formed Nov 2002, name changed Nov 2004
DistributionSource LLC	DE	DirectRevenue LLC	Alive
Ec16Media, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
4starshops, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
FreePhone LLC	DE	DirectRevenue LLC	Alive
Grand Street Media Buying LLC	DE	DirectRevenue LLC	Alive
MyMerchants LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
Shopwithus, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
Soho Digital, Inc.	NY	DirectRevenue, LLC	Acquired December 2004
Soho Digital (Israel) Ltd.	Israel	DirectRevenue, LLC	Alive

ThinkMedia, LLC	DE	DirectRevenue, LLC	Alive – formerly an LP
Trafficash, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
Trafficmart, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04
Yeslists, LP	DE	Grandstreet Media Buying LLC	Canceled 3/18/04

The following Table 11b lists entities that were owned by the original the founders of DirectRevenue, LLC (Josh Abram, Rodney Hook, Daniel Kaufman and Alan Murray) (the “Founders”), in varying degrees of ownerships, but were separate and distinct entities from DirectRevenue.

**Table 11b**

Entity Name	Juris of Incorp	Owner	Status
Best Offers, Inc.	NV	Founders	Dissolved 3/19/04
BetterInternet, Inc.	NV	Founders	Dissolved 3/19/04
Blackstone Data, Inc.	DE	Founders	Dissolved 3/18/04
Commerceinc, inc.	NV	Founders	Dissolved 3/19/04
IPInsight.com, Inc.	DE	Founders	Dissolved 3/18/04
MSView Inc.	Belize	Founders	Abandoned
Stop Pop Up Ads Now, Inc.	NV	Founders	Dissolved 3/19/04
Tps 108, inc.	NV	Founders	Dissolved 3/19/04
TrueData, Inc.	NV	Founders	Dissolved 3/19/04
VX2 Corp.	NV	Founders	Dissolved 3/19/04

The only relationship beyond common ownership among these later entities and the earlier cited entities is that VX2, TrueData and MSView each had distributed their own target software prior to the formation of DirectRevenue and DirectRevenue licensed the technology from these companies and acquired their distributed ad clients in order for DirectRevenue to start its own business.

Home

vx2, Inc. is a software development company. We have developed a series of ad targeting applications such as vx2.dll that help advertisers deliver targeted ads. In addition to our software development, we also provide certain support services to the distributors of our software.

Third party companies license and distribute our software, typically as part of their sponsorship of free software or free content. As part of any licensing of our software, vx2 contractually requires all distributors to give notice concerning the presence of our software and to provide consumers access to a vx2 supplied privacy policy.

**If you would like to remove pop-up ads from your PC we recommend Ad-aware, a free software program available at [www.download.com](http://www.download.com).**

**If you would like to remove the vx2 program manually please use the following instructions:**

The vx2 software is a single program file in the system directory called vx2.dll.

**To remove VX2:**

1. From the Control Panel select ADD/REMOVE programs. Select "vx2 RespondMiter" and "Remove".

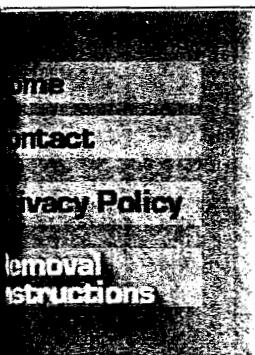

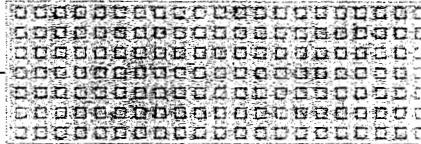

**If VX2 RespondMiter is not present:**

2. Close all internet explorer browsers.
3. Search your "C" drive for xv2.dll.
4. Delete vx2.dll.

**If the system does not permit the file to be deleted proceed as follows:**

5. Select "Start" and then "Run" and type "regedit".
6. Find the and delete the entry named "HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Explorer\Browser Helper Objects\ {00000000-5eb9-11d5-9d45-009027c14662}".
7. delete the {00000000-5eb9-11d5-9d45-009027c14662} entry.
8. Reboot computer.
9. Search your "C" drive for vx2.dll.
10. Delete vx2.

# TPS108

If you want to uninstall, you can do so easily through the add/remove function in your control panel. You can access your control panel by going to:

1. Start (typically, the button in the bottom left of your screen)
2. Choose SETTINGS
3. Choose CONTROL PANEL
4. Choose ADD/REMOVE PROGRAMS
5. Select TPS108
6. Click on ADD/REMOVE

Of course we encourage you to leave it on so that you can benefit from the occasional offers that it shows you. If you need more information, or experience any technical problems, please contact us at [techsupport@TPS108.org](mailto:techsupport@TPS108.org). We look forward to hearing from you.

In the absence of an entry in ADD/REMOVE PROGRAMS please use one of the following methods: For Windows98 and WindowsXP users:

- a) To permanently disable the software click "Start" and then "Run" and type the following command which unregisters the software: `regsvr32 c:\windows\TPS108.dll -u`
- b) To completely remove the software: reboot and then Find and Delete the file TPS108.dll.

For Windows2000, WindowsME and WindowsNT users:

- a) To permanently disable the software click "Start" and then "Run" and type the following command which unregisters the software: `"regsvr32 c:\winnt\TPS108.dll -u"`
- b) To completely remove the software: reboot and then Find and Delete the file TSP108.dll.

\$108, Inc., 2002
